Same as Scheme 3 but with compass herald
in place of large solid pennant

Steel boxcars - Paint Scheme 4C

AA 1200-1399

Same as Scheme 2C but with compass
in place of medium solid pennant

GENERAL NOTES

1. "ANN ARBOR" used on ends of AA 68000-series, AA 1000-series and 250-series cars. Later on replaced by "A. A." Pullman-Standard cars only had "A. A." on ends.
2. Many cars upgraded from 50-ton to 55-ton capacity. This is commonly seen on cars with Scheme 2B and 3 but many variations exist.
3. Many 1000-series cars exhibit the Wabash practice of a space between "1" and the last 3 digits of the car number.
4. In the DT&I era many 1000-series cars had Scheme 2B or 3 but with no herald at all.
