

Barron Tableland Railway – BLV (B Class, Lavatory, Guards Van)

An adaption of a CLV Van using a Bachmann coach with several window INFILLS & Guards Lookout.

The real coach CLV 477 is the inspiration for the proportions for the BLV Class Guards Van.

My aim was to model the “look” of a CLV to make the BLV model of a similar appearance.

The component parts were fashioned from 3.0mm, 2.0mm & 0.5mm styrene.

The Guards “Look-Out” was made as a sub-assembly to allow trial fitting.

Barron Tableland Railway – BLV (B Class, Lavatory, Guards Van)

An adaption of a CLV Van using a Bachmann coach with several window INFILLS & Guards Lookout.

The plain B Class coach prior to modification.

Modifications trial fitted.

Trial fit checks completed, all the components are removed, painted, then glued into final place.

The "Look-Out" sub-assembly being tried in a few optional locations along the coach side.

Two plain B Class coaches have been modified this way.

All new parts were painted before they were fitted into final locations.

These models are fore-shortened versions that hopefully capture the look of a CLV.
