

## The CWW Class – Chord Wood Wagon.

Chord Wood is used to fire the vertical Boiler for the Quarry Crane.

The Chord Wood Wagons are scratch built of wood, the wheels are Bachmann brand.

Standard Flat Wagons are fitted with Craddles, as and when required, to carry stacked Chord Wood. The Craddles are demountable and can be stored off-wagon until required.

Craddles can be used to carry other loads too.

A Flat Wagon returns to standard use.
