

The BTR – CROSSOVER on Spiral Bridge 2020

This allows several train running configurations as depicted in the sketches below.

The **TOP CIRCUIT** is useful if we want to run a test Loco or Train without opening the whole layout. If there is a train delay elsewhere, a train here can go into a holding circuit until the line elsewhere or ahead is clear to proceed.

The **DOGBONE CIRCUIT**, runs from Hells Gate Junction clockwise to Hammock Junction, Purgatory Scrub then at Spiral Junction onto the descending Spiral Line and eventually Sundial Loop then returns ascending to the summit at Purgatory Scrub.
