

The BTR Station at Finch Haven

All buildings for the BTR are removed after train running days and stored indoors.

The shell is made of 8mm plywood.
That was covered with profiled styrene sheets.

Doors and Windows were fabricated from Styrene.

The basis for this model was the Station at Amiens QLD.

Profiled styrene wall cladding was glued to plywood.

Corrugated roofing sheets glued on.

The completed model set up on Garden Railway ready to serve the people and goods traffic.
