

# BTR Perway Railmotor

Freelance model comprising spare parts collected over the years.

Cab made from 2mm styrene, under-frame and rear tray are 2mm plywood, side gates are split pine.

Gearbox fabricated in 0.8mm Brass.

Leading bogie made from Styrene & Brass.

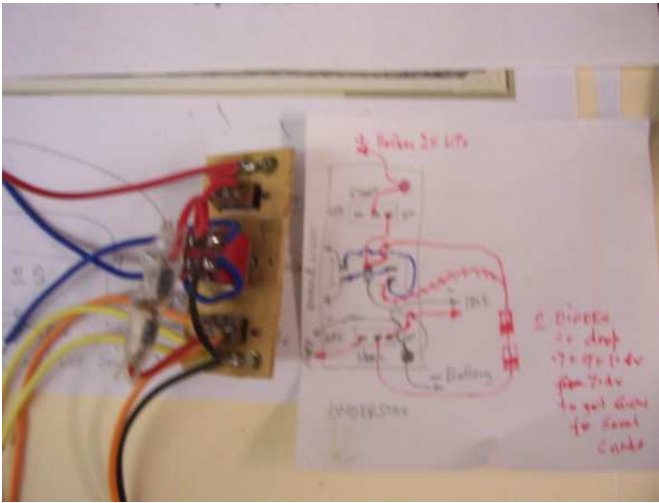

Radiator, engine Hood and Headlights are Diecast parts salvaged from a model car.

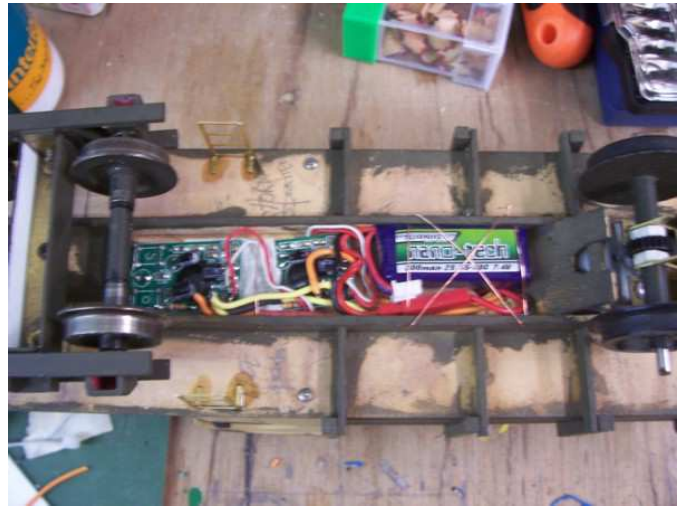

Motor is battery powered, direction switch has center off and yet still with engine idle sound. Engine sound and a horn with underfloor speaker box, sound card and battery.

# BTR Perway Railmotor

Freelance model comprising spare parts collected over the years.

Switch arrangement & wiring diagram.

Two 20 second sound cards & 2S 300mAh LiPo.

Engine & Hood from a Die-Cast truck model.

Load in Tray helps take eye away from switch box.

Underfloor is as tidy as can be attained.

A Tarpaulin may be used to hide the switch box.

Box in centre of rear tray covers motor and gearbox.
