

Lionel Ambassador Club Product Review of the American Flyer Southern Pacific Passenger Car 2-packs by CASG

The Lionel / AF Southern Pacific Passenger Car 2-packs 6-48912, 6-48915 & 6-48918 were illustrated in the 2015 & 2016 American Flyer catalogs by Lionel.

All cars in the sets are of the same streamline design as those in the original 1981 set. All the cars are the familiar Daylight Orange and Black color scheme with silver end plates. All have operating knuckle couplers, metal trucks, stamped metal frames, illumination and window silhouettes. The colors in these SP 2-pack sets are slightly brighter than the original 1981 set but match the 6-42573 SP PA-1/PA-1 set released in 2014. The silhouettes in the 2-pack cars are more translucent allowing the illumination to be slightly brighter as well. The 6-48912 & 6-48918 SP 2-pack sets provide the combine, observation and passenger cars to go with the 6-42573 PA-1 set for those who did not get the 1981 set or wish to add to their existing set. These SP cars also goes well with the SP Full Vista Dome Car and Baggage car released in 2011. The 6-48915 SP 2-pack set consists of a Diner car and a Vista Dome car. The Diner car is new to the SP passenger configuration. See our video below to sees how well all the sets and extra cars blend together to form a great passenger set.
