The main section of this index is divided alphabetically into individual countries. For countries with only a few references there is a single line of entry; for those with more frequent references, sub-divisions are given, and in the case of countries such as France and West Germany where numerous minor railways have featured in CRJ, each has been given a separate line of entry. Some items which have appeared in CRJ do not fit easily into a geographical classification. These are listed in a separate section at the end, whilst for convenience a few items appear in both sections. Page references are printed in different types to distinguish between the three major classes of entry, as follows:—
