Application Note

NTRAK Show Module Check List

Show: _____ Dates: _____

Show Superintendent: _____ Asst/Superintendent: _____

Introduction

This document provides a checklist for NTRAK modules needed for Train Show layouts. The Show Superintendent can use this list to determine and track the modules needed for the Train Show, where they are normally stored and how they will be transported to the show site. There is space to list NTRAK modules from other clubs participating in the train show. Note that there is a separate checklist for other material needed for the Show.

The Show Superintendent should print out this list and fill in the appropriate information. He/she can then track the various items to ensure their selection, transport and availability for the Show.

Show Module Checklist
