## Application Note

### T-TRAK Show Material Check List

Show: \_\_\_\_\_ Dates: \_\_\_\_\_

Show Superintendent: \_\_\_\_\_ Asst/Superintendent: \_\_\_\_\_

#### Introduction

This document provides a checklist for material needed for Train Show T-TRAK layouts. The Show Superintendent can use this list to determine the material needed for the Train Show, where it is normally stored and then list how it will be transported to the show site. Note that there is a separate checklist for T- TRAK modules that will be in the Show.

The Show Superintendent should print out this list and fill in the appropriate information. He/she can then track the various items to ensure their selection, transport and availability for the Show.

#### Show Material Checklist

##### General
