

In addition to:

SAVING  
THOUSANDS OF  
DOLLARS

by:

PARKING  
YOUR CAR

AND

RIDING ON  
STARTRAN BUSES,  
statistics show you are  
SIGNIFICANTLY  
less likely to be injured  
or killed by riding  
public transit.

By riding StarTran  
public transit you  
can improve your  
chances of a safe trip  
**BY 10 TIMES**  
compared to  
driving a car.

ARE YOU  
SAFER RIDING  
STARTRAN THAN  
DRIVING YOUR  
CAR?

[www.cfitlincoln.com](http://www.cfitlincoln.com)

A recent nationwide study done by the American Public Transit Association disclosed there are

## 10 TIMES FEWER INJURIES AND FATALITIES

riding public transit (city bus systems, Amtrak, commuter rail, streetcars or intercity buses) than driving your own car.

A recent analysis done by the Highway Safety Office of the Nebraska Department of Transportation going back 10 and 1/2 years from July 2018 reported that there were

## NO FATALITIES

to bus drivers or passengers on StarTran during that time frame.

There were **ONLY 12 DISABLING INJURIES** between 2008 and 2018

involving bus drivers and passengers in which StarTran buses were involved.

Further supporting StarTran's emphasis on safety, StarTran buses experienced **ONLY**

**2.9 ACCIDENTS PER 100,000 MILES DRIVEN.**

Other public transit systems have accidents at the rate of:

**4 TO 6 ACCIDENTS PER 100,000 MILES OF OPERATION.**

Finally, riding a StarTran bus you can work on your laptop, listen to music on headphones, read a book or doze without dangerous consequences.

Being safe from death or serious injuries are concerns we all share.

INCORPORATING SIMULATOR TRAINING, as StarTran has done during their instructional program has been shown to

**CUT THE NUMBER OF ACCIDENTS by as much as 66 PERCENT.**
