

2016 Survey of Sociological Indicators Conducted by: UNL Bureau of Sociological Research

The findings above indicate that there is rail support in Nebraska. Where respondents did not give support, they were much more likely to be neutral on the subject than report disagreement.

N values for the questions are: Question 1 = 1,184; Question 2 = 1,184; Question 3 = 1,185; Question 4 = 1,181. With 1,208 total respondents, the survey had a 26.9% response rate of the 4,500 addresses sampled.
