McKenna Ave.; then turn left on McKenna and go 0.2 mi. to South St. Turn right on South St. and the Library is on the right (north). **From Lincoln** proceed northeast on I-80 to the Rte. 31 Nebraska Crossing Exit 432. Proceed north on Rte. 31 2.6 mi. to S 216th St., then turn left and proceed on 216th St. 0.4 mi. Then bear right onto South St. and proceed 0.2 mi. to the Library.

Parking is available on South St. and the Elementary School across the street from the Library.

Nebraska Legislative 2025 Session News

By Richard Schmeling, ProRail Nebraska Lobbyist

Bob Kuzelka and I met with Sen. George Dungan well before the start of the 2024 Session. The Senator recommended that we not introduce any new bills in this session because it would be a short session and many bills were carried over from 2023. As it turned out, many new bills were introduced in this session.

The net result is that the majority of bills either did not make it out of committee or there wasn't enough time left to debate and pass them.

Our LB44 seeking to have Nebraska rejoin the Midwest Interstate Rail Passenger Compact (MIPRC) did not make it out of the Transportation & Telecommunications (T&T) Committee, reportedly

stalled on a 4 to 4 vote to advance it. Sen. Bostleman, a member of this committee and who has always been a “no” vote on railroad matters, is term-limited out at the end of this session. Hopefully, the composition of the T&T Committee will change in 2025 resulting a more favorable outcome for railroad-related bills.

Also failing to pass was LB31 introduced by Sen. Mike Jacobsen of North Platte. That bill would have mandated two-man crews on trains operated by Class I railroads in NE. LB31 did make it out of committee but failed to advance on the floor. However, the need for this bill has disappeared as a result of the FRA’s issuance in April of its final rule mandating a minimum of two crewmembers on most trains operated by Class I railroads. As expected, this rule is vigorously opposed by the railroads and are seeking federal legislation to eliminate the FRA’s rule.

The sole railroad success story this session was LB 1084 introduced by Sen. Teresa Ibach which is the Nebraska Short Line Railroad Modernization Act. This act would give shortline railroads tax credits against state income taxes for funds spent upgrading track. A cap of \$5,000 per mile was included. LB 1084 was amended into Sen. Bostar’s LB 937 which is a “Christmas Tree” bill including many subjects designed to get more measures enacted in this session. LB937 was signed by the Governor April 23.

Another casualty in this session was a carryover bill introduced by Sen. Lynne Walz which would have required railroads to report annually on blocked crossings. With UP and BNSF running many double-length trains in Nebraska which are prone to mishap and require more time to repair and get moving, crossing blockage is a real issue. The railroads opposed the bill saying that even if there are crossing blockages, laws to impose penalties against railroads by the states for blocked crossings have had a checkered history in the court system with most laws being struck down. Although Sen. Walz’s bill only required reporting, the next logical step was a bill to prevent excessive blockages. This bill did come out of the T&T Committee and was on General File but not enacted.

LB 1212, also introduced by Sen. Walz, would task the Nebraska Public Service Commission with enforcing railroad safety. The railroads opposed this measure saying that the FRA already has many rules in place and Federal inspectors enforcing them. Those who favored the bill pointed out that the FRA regulators have “holes” regarding trackside detection devices and enforcement by the feds is not enough. Sen. Walz pointed to a large number of rail derailments in Nebraska, some minor and some major. Some involved hazardous materials. LB 1212 did not pass in this session.

It's Time to Renew Your Membership

Letter from ProRail Nebraska's President

Dear Friend,

It is time again to ask for you to renew your support of ProRail Nebraska. Although modest, your dues allow our organization to continually move forward in support of public transportation, and more specifically, passenger rail issues. Your membership not only sustains us financially but goes to show the breadth of support for our issues.

When asked about what sets our organization apart from others, it is our work on issues other than just passenger rail. We continue to and always will advocate for increased passenger rail access and use within the State of Nebraska. Other modes of transportation do exist, and we continue to work on public access to them as well. Your contributions are furthering the acceptance of and support for passenger rail and public transportation in Nebraska.

Thank you for your continued support of ProRail Nebraska. As we continue to educate State Senators about the benefits of passenger rail, it is great knowing that you stand with us.

Enclosed with this newsletter is a ProRail membership brochure. Use the tear-off form to enclose with your payment. If you're not yet a ProRail member, please use the form to join!

Matthew Roque, President, ProRail Nebraska
